

AgrAbility helps farmers with disabilities and their families succeed. The program links MU and Lincoln University extension services with a nonprofit disability organization to provide practical education and on-the-farm assistance that promotes agricultural and rural independence.

The National Institute of Food and Agriculture (NIFA), an agency of the U.S. Department of Agriculture (USDA), administers the AgrAbility Project.

The Missouri AgrAbility Project is under sponsored number 2014-41590-22323.
